8 Premium Lightroom Presets — UncleMarv Travel Brand

8 Film-Grade Travel Presets

Dark Moody · Film Faded · Golden Hour · Cinematic · Landscape
Urban Grit · Airy Travel · Black Ice

HOW TO INSTALL — LIGHTROOM MOBILE (FREE APP)

- Step 1** Download the .zip file and extract it on your phone.
- Step 2** Open Lightroom Mobile. Tap the + icon → Preset → Import Presets.
- Step 3** Navigate to the extracted folder and select all 8 .xmp files.
- Step 4** Find the presets under Presets → User Presets → UncleMarv.
- Step 5** Open any photo, tap Presets, pick one — done. Adjust to taste.

HOW TO INSTALL — LIGHTROOM CLASSIC (DESKTOP)

- Step 1** Open Lightroom Classic. Go to Develop module.
- Step 2** In the Presets panel, right-click → Import Presets.
- Step 3** Select the 8 .xmp files from the extracted folder.
- Step 4** Presets appear under User Presets. Click to apply.

Pro Tip: Every photo needs slight tweaking.

Apply the preset first, then adjust Exposure ± 0.3 and Highlights ± 20 to match your light.
The fine-tuning ranges on the next pages tell you exactly what to touch.

Preset Guide

Fine-Tuning Tips & Adjustment Ranges

THE 8 PRESETS — WHEN & HOW TO USE THEM

UM Dark Moody

Dark · Cool · DesaturatedBest for: Cityscapes, architecture, moody portraits, overcast days

1

Exposure	−0.5 to 0.0	Darker = more drama. +0.1 if skin looks muddy.
Highlights	−80 to −40	Sky detail: push lower to recover blown areas.
Shadows	0 to +25	Lift if faces are too dark in shade.
Blacks	−35 to −15	Deeper blacks = more punch. Don't crush completely.
Vibrance	−30 to −10	More negative = more desaturated / cinematic.

UM Film Faded

Analog · Warm · FadedBest for: Street, portraits, café scenes, retro vibes

2

Blacks	+15 to +35	Key for the faded look — lift higher for vintage feel.
Contrast	−20 to −5	Lower contrast = more analog. Never go positive.
Shadows	+25 to +40	Lifted shadows preserve the milky film base.
Vibrance	−35 to −20	Muted palette. More negative = more faded film.
Tint	+5 to +15	Slight green cast adds authentic film character.

Preset Guide

Fine-Tuning Tips & Adjustment Ranges

UM Golden Hour

Warm · Golden · VibrantBest for: Sunrise/sunset, beach, travel portraits, warm climates

3

Temperature	6500 to 7500	Warmer Kelvin = more golden glow. Adjust to your light.
Highlights	−35 to −15	Protect sky from blowing out in bright sun.
Oranges sat	+15 to +30	In HSL panel — controls skin and golden tones.
Vibrance	+10 to +25	Raise for more pop. Lower if skin looks over-saturated.
Exposure	0.0 to +0.4	This preset shines in natural light — don't overexpose.

UM Cinematic

Teal-Orange · Filmic · BoldBest for: Any travel photo, landscapes, action shots, groups

4

Shadow toning	Keep teal H:195	Color grade: shadows stay teal — don't change hue.
Highlight toning	Keep orange H:30	Highlights warm orange = the Hollywood split tone.
Clarity	+15 to +30	More clarity = sharper cinematic detail in textures.
Saturation Oranges	+20 to +35	Boosts skin and warm tones without affecting sky.
Blues sat	+20 to +35	Richer teal in shadows and water. Don't go above +40.

UM Landscape

Vivid · Natural · SharpBest for: Mountains, forests, water, skies, wide shots

5

Dehaze	+10 to +25	Clears atmospheric haze — perfect for mountain shots.
Clarity	+20 to +35	More structure in rocks, trees, clouds. Don't use on fa
Greens sat	+15 to +30	Richer foliage. Reduce if grass looks neon.
Blues sat	+20 to +35	Deep blue sky. Lower if sky looks artificial.
Vibrance	+20 to +35	Overall pop without over-saturating skin tones.

UM Urban Grit

Gritty · High-Contrast · RawBest for: Street photography, markets, urban decay, night shots

6

Contrast	+30 to +45	High contrast = raw urban energy. Core of this preset.
Blacks	−30 to −45	Deep blacks create gritty separation. Don't lift here.
Clarity	+25 to +40	Brings out texture in concrete, fabric, graffiti.
Saturation	−25 to −10	Desaturated but not B&W — keep a hint of colour.
Shadows	0 to +15	Lift slightly if shadows are totally crushed.

Preset Guide

Fine-Tuning Tips & Adjustment Ranges

UM Airy Travel

Bright · Clean · Summer

Best for: Beach, tropical, Instagram travel, lifestyle, food

7

Exposure	+0.3 to +0.7	Brighter = more airy. Reduce if highlights blow out.
Blacks	+15 to +30	Lifted blacks = soft, clean look. More = milkier whites
Highlights	−40 to −20	Protect sky and water even while keeping it bright.
Vibrance	+5 to +20	Gentle boost. This style is clean — don't oversaturate.
Whites	+10 to +25	Bright whites = airy feel. Watch for blown-out details.

UM Black Ice

B&W · Dramatic · Timeless

Best for: Architecture, moody landscapes, fine-art portraits, fog

8

Contrast	+25 to +45	More = dramatic. Less = softer, misty B&W.
Blacks	−25 to −40	Deep blacks for maximum punch in shadows.
Clarity	+25 to +40	Essential for texture in stone, water, clouds.
Red mixer	+5 to +20	Brightens skin tones in B&W. Add when faces are dark.
Blue mixer	−10 to −25	Darkens sky dramatically — creates stormy mood.

THE GOLDEN RULE OF PRESETS

A preset is a starting point, not a final answer.

Apply → adjust Exposure → adjust Highlights → done.

Most photos only need 2–3 tweaks after applying a preset.

If something looks wrong: first check Exposure, then White Balance, then HSL Saturation.
