01

Solo Shots.

100+ poses for solo travelers that don't look like a passport photo.

The Walking Shot.

Works everywhere. Looks effortless. Is effortless.

Setup: Ask your photographer to stand ~10 metres ahead. Walk toward them naturally — not a model walk, not a shuffle. Just walk.

Look: Slightly down at the ground, then glance up just before the shot. That natural head lift is gold.

Frame: Camera at waist height. Full body in frame, environment visible on both sides.

Variant: Walk away from camera, look back over shoulder at the 3/4 mark. Classic. Always works.

▮ THE MARV NOTE

This pose has saved 100+ of my travel shots. The secret isn't the pose — it's the light. Do it at golden hour (1 hour after sunrise, 1 hour before sunset) and even a bad photographer makes it look like a film still.
